<- ¹	Given a match between team A and team B represented by an array, the task is to determine which team wins based on the occurrences of even and odd numbers in an array.	
F7853,	Rules:	z CK
	If an even number has an even occurrence, it supports team A; otherwise, it supports team B.) ² 2
202	 Similarly, odd numbers support team B if they have even occurrences, otherwise, they support team A. If there's a tie, print 'T 0'. 	
34.CV	Input Format:	·01/4
C	The first line contains an integer n, denoting the number of elements in the array. The second line contains n integers separated by space, representing the array elements.	
1 tyle		~~ <u>~</u>
	Output Format: If either of the team wins display the team name ('A' or 'B') and how much support the team wins separated by space.	NB2'3
(S)	Lise if there is a tie display if 0
